975 Manual Can-Crusher

- All stainless steel construction
- Manually operated
- Pneumatically powered
- Minimal controls for ease of use
- Fully interlocked for safety
- Completely hose proof design
- Mounted on four adjustable legs each with bolt down facility
- Manual can rinse facility (option)
- Crushed can bin (option)
- Versions available for most can sizes
- Totally pneumatic and mechanical models also available

The Model 975 manually operated pneumatic Can Crusher has been specifically designed for the purpose of crushing empty cans opened using a Model 150 Can Opener.

The empty cans are hand fed into the crushing chamber, when the guard is lowered the can is crushed to approximately 25% of its original height. The guard is then raised and the next can inserted into the chamber, the previous can is automatically displaced out the back of the chamber and into a collection bin (option) for disposal.
